Reference Books of 1962

A list of last year's outstanding reference books, prepared specially for Lj and recommended by a committee of the Reference Services Division of the American Library Association

By THOMAS SHULER SHAW

LAST YEAR was particularly notable for the number of major revisions of standard reference works, and the selection below reflects this trend. It indicates an awareness on the part of editors and publishers of the need for up-to-date materials in this field, and deserves commendation.

The number of reference tools examined by the selection committee was many times the total of 107 listed here. The scope of the list — the aim of which is to select publications suitable for small and medium-sized libraries, with emphasis on the public library but with possibilities of usefulness for smaller college libraries — necessarily eliminates a large number of titles.

Fortunately, many of those omitted are given notice in the list for college and research libraries which appears in the journal by that name, and in Frances Neel Cheney's general list in the *Wilson Library Bulletin*, among others.

There are, too, certain types of material that the committee has ruled out of the list but has often felt worthy of mention in the preface. Among such publications should be mentioned the revival of *American Notes & Queries*, by Lee Ash, the first issue of which appeared in September 1962 bearing New Haven as the place of publication. This periodical should assist many reference librarians in locating sources of

quotations and other information that have been baffling them, and Lawrence S. Thompson's section on foreign reference tools should prove particularly helpful in the selection of works in that area.

Ohio Authors and Their Books (Cleveland: World) by William Coyle, provides biographical information not easily found elsewhere on authors who were born or lived in that state. The committee hopes that this work will start a trend of publication of such works, as they would prove useful for each of the states in the Union.

Subscription Books Bulletin Reviews: 1960-1962 (Chicago: ALA) is a work that will save much time in locating evaluations of reference books published in the past three years.

Reference librarians have an adage that there can never be enough biographical compilations in their collections: examination of the list will disclose that several major gaps have been filled by both general and special subject publications. Publishing of reference tools in the fields of fine arts and religion has also remained strong, but such areas as gardening, college guidance, etc., which have been very active in the past several years, appear to have reached a level. Many science and technology works were either too specialized or too expensive for inclusion in this list.

Mr. Shaw is visiting professor at the Louisiana State University Library School, and chairman of the RSD committee responsible for compiling this annual *Lj* reference list

The committee has, as usual, added several titles that were published in 1961 which came to its notice too late for inclusion in last year's list.

Members of the committee were: Mrs. Julia Bartling, head of the Reference Section, State University of Iowa Library, Iowa City; Penelope Bullock, assistant reference librarian at Eastern Michigan College Library, Ypsilanti; James K. Dickson, head of the Fine Arts Department, Enoch Pratt Free Library, Baltimore, Maryland; Doris M. Savage, head of the History and Travel Division at the Rochester (New York) Public Library; Helen Northrup, head of the General Reference Department at the University of Wisconsin Library, Madison; Margaret Smart, head of the Industry and Science Division, The Dayton and Montgomery County (Ohio) Public Library; Anne F. Sturtevant, head of the Education, Philosophy and Religion Department at the Free Library of Philadelphia; and Thomas S. Shaw, visiting professor at the Louisiana State University Library School, Baton Rouge, chairman.

The committee wishes to thank the reference staffs of each of the libraries mentioned above for the cooperation and assistance given in compiling the list, and the chairman wishes to thank his wife, Mary Elizabeth Shaw, for proofreading the final text.

Biography

(Special biography is listed under subject, e.g. Science and Technology)

CHAMBER'S Biographical Dictionary. J. O. Thorne, ed. rev. ed. N. Y.: St. Martin's Press, 1432p. \$15. Edinburgh & London: Chambers, 70s

Completely revised and expanded by half original size, now contains 15,000 biographies. Includes contemporary personages as well as those of past. Each entry is significant commentary rather than bare listing of facts. Difficult names pronounced. Subject index locates authors through their books, artists through their paintings, historical personalities through associated places and events.

CONTEMPORARY Authors. Vol. 1- Quarterly. Detroit: Gale, 4 vols. per yr. \$25 per yr.

Bio-bibliographical guide to new and relatively unknown as well as established authors. Includes American (and a few foreign) writers of juvenile books, fiction, poetry, texts in social sciences, and nonfiction of general interest. Authors at professional level in technological, physical and biological sciences not included. Works in progress as well as published writings are listed.
